

# UKWAS 4

**WEBSITE AND PUBLICATION  
USABILITY SURVEY**

# **65 RESPONSES**

**Survey ran from: Monday 1 April 2019–Friday 24 May**

# PURPOSE OF THE SURVEY

We stated that the purpose of the survey was to gather feedback on the usability of UKWAS V4 and the formats in which it is delivered – it was not about certification schemes per se, nor the contents and requirements of UKWAS.

We also stated that the detailed survey results would be anonymous and only used to create a feedback report with recommendations to the UKWAS Steering Group/Board.

The survey feedback and recommendations will be considered in 2020 when the next revision cycle begins.

# Survey questions (1–12)

## About you

Q1–4 Name/Organisation/Job title/Email address

## Certification status

Q5 Are you currently certified? Yes/No

Q6 Is it an Individual or Group scheme? (Individual/Group)

Q7 What is the area of certified forest/woodland (hectares)? (<10/10–50/50–250/>250 ha)

Q8 How long have you been involved with UKWAS? (V1/V2/V3/V4)

## Accessing the UKWAS Standard and supporting documentation

Q9 How easy do find it to access information on UKWAS?

Very easy/Easy/Neither easy nor difficult/Difficult/Very difficult (plus further comments box)

Q10 When do you use the UKWAS Standard?

(Planning/General forest management/Before an audit/During an audit/Don't use – leave to auditor)

Q11 Where do you tend to use the UKWAS Standard? (In the office/In the field)

Q12 Which formats do you use? (plus further comments box on format choices)

Web pages/PDF on computer/PDF on mobile platform/PDF printed off/Bound official booklet

# Survey questions (13–18)

## Usability and structure of the UKWAS Standard

- Q13 We've changed the structure of the UKWAS Standard in V4 to make it more logical/easier to navigate. Do you agree that the new format is easier to use? Strongly agree/Agree/Neither agree nor disagree/Disagree/Strongly disagree (plus further comments box)
- Q14 What do you like about the structure and format of UKWAS v4?
- Q15 What do you dislike about the structure and format of UKWAS v4?
- Q16 How could we improve the usability of UKWAS in future?
- Q17 In what format(s) would you like the Standard to be published?
- Q18 Do you have any other comments to add?

# Respondents currently certified

# Individual or Group schemes

# Area of certified forest/woodland (ha)

# Length of time involved with UKWAS

# Ease of access to UKWAS information

# Ease of access – free text responses

- [www.ukwas.org.uk](http://www.ukwas.org.uk) is at the top of the list when carrying out a Google search.
- Information accessible on the website in a manner that allows for easy interrogation.
- Accessible website, simple to navigate. Options to expand or hide additional information to assist with searching specific information.
- Information is online and available from company support (Tilhill).

# When UKWAS standard used

# Where UKWAS standard used

# Which format of UKWAS standard used

# Format choice – free text responses

- We have an electronic copy in OneNote within each audit for auditors to reference (Tilhill).
- I find it much easier to use a hardcopy of publications.
- Official (bound) booklet is still worthwhile.
- Printed version would be good (bound).
- I much prefer the PDF copy to the interactive version on the web page.

# Agreement that V4 format easier to use

# What is liked about UKWAS 4

**Most respondents liked the 'Logical format of layout, colour of pages and text boxes' and found it easier to follow.**

- Structured and logical topic headings
- A more logical flow through the issues as they arise during an audit.
- Better structured. Easier to become familiar with the document
- Easy to navigate, clauses grouped better
- Clear language/easier to interpret
- Lots of useful guidance/guidance notes
- Clarity on what is a requirement and what is guidance. Easy to differentiate between guidance and example verifiers.
- Easy to follow verification guidance in V4
- Information flow better and easier to get to the pages you need using the content pages.
- Clear and easy to find relevant questions.

# What is disliked about UKWAS 4

**A few respondents feel that navigation still takes times as: 'It's a lot of words/Still a very large document/Long/Lengthy, could be more concise'.**

- Typeface is quite small in official handbook.
- I do not like the double column layout, for me difficult to follow.
- I did not like the online HTML format – prefer PDF format.
- Difficult to locate particular requirements unless you are very familiar with the document.
- Grouping of requirements within sections does not always seem logical. It feels like more requirements have been added than removed.
- The standards are too wordy and open to interpretation. It should be more clear cut with requirements, and be aligned more to industry standards.
- Too wordy and jumbled up. It could be streamlined to be even simpler again.
- Glossary of terms could have had the page reference, i.e. deadwood related pages xxx
- Some topics are covered in great detail with numerous sub-clauses and details and others less so.

# How usability of UKWAS could be improved

Responses ranged from 'no improvements necessary' to ... 'UKWAS and UKFS should be combined/fully integrated' or 'aligned with other ISO management standards'.

- Keep as simple as possible with references to best practice/Make it shorter and simpler.
- Use of colour coding – step-by-step ?
- An up-to-date list of permitted chemicals on the website would help managers.
- Narrow the sub-clauses and incorporate requirements in the guidance and indicators
- Less wordy, Less subdivision, e.g. 2.15.1 c
- Single column, start with requirement, follow with Example verifiers, then the guidance.
- Simplify requirements, sometimes these can be confusing, particularly in an audit situation.
- Consider adding 'How you can demonstrate this' under guidance notes for each item.
- The use of visual tutorials, and to streamline chapters that are to the point regards upholding standards with day-to-day commercial operations.
- An index would be useful and keywords at each sub clause. I seem to spend ages trying to find requirements i know are in there!
- it should give examples of best practice in record keeping to help guide on new subjects.

# Preferences for future formats

**Most respondents happy with current formats – printed hard copy and digital PDF (within this – there is a preference for ‘bound’ printed copy and an ‘interactive’ PDF).**

- Interactive = clickable links for guidance/glossary and links to related requirements and glossary explanations.
- The digital version should have a good search function (requiring all tables etc to be appropriately tagged so they appear in searches).
- Combining it with a editable digital checklist would be good.
- The website should have a search engine to find particular phrases or topics
- An app-based format/mobile-friendly version would be useful.
- Pamphlet overview.
- Preferred format and structure depends on audience (practitioner, auditor, stakeholder). [Tilhill has its own internal guidance so that practitioners get the information they need. Otherwise extracting the relevant information is time consuming.]
